Start Talking **Science**
Philadelphia 2018

About Start Talking Science: Start talking Science (STS) is a free public event where STEM (Science, Technology, Engineering, and Mathematics) researchers present non-technical posters to the community. We aim to increase the public awareness of—and interest in—cutting-edge, local research in order to make STEM more accessible. We hope to foster insightful conversations and connections while strengthening the communication skills of researchers. For more info, visit StartTalkingScience.com.
