

Transformational Leadership: What Life Sciences Women Need to Know

An interactive professional development program led by

Susan Morris MEd, CPCC, ACC

[Susan Morris Coaching](#)

Susan Morris has been a leadership consultant and professional coach for more than three decades. She has partnered with individuals and teams in the US and globally in the life sciences. Susan's passion is to help STEM professionals fulfill their career potential.

Women occupy 40% of managerial positions in the United States; 6% of the Fortune 500's top executives are female; 2% of those top firms have women as CEO's. These statistics are a sad commentary for talented women who do not have easy access to a seat at the top of their organizations. The glass ceiling and old boy's network are still alive and well in corporate America. This interactive presentation seeks to convey that women are natural-born leaders. Women can and must transform their organizations, especially in the life sciences industries.
