

Creative Communication in the Sciences

Presented by

[Yeonsoo Sara Lee, BS](#)

M3 Medical Student, Mayo Clinic Alix School of Medicine

[Ambalika \(Rika\) Khadria, PhD](#)

Founder and Creative Director, KathASK Films, LLC, Science Filmmaker at UNC-Chapel Hill Department of Pharmacology

Science Through the Lens of Art

A few decades ago, Ann Row, a clinical psychologist said, “Nothing in science has any value to society if it's not communicated.” These words have never been truer today. Science communication has long been limited to scientific circles through specialized journals which shielded the public from accessing vital knowledge. To help broaden scientific reach, many have taken it upon themselves to disseminate information to the public using a wide range of creative skills.

In this interactive event, we will highlight the works of Yeonsoo Sara Lee, a medical student and illustrator, and Ambalika Khadria, a biochemist-turned-filmmaker.

Please join us to learn about how you can also use your creative skills to effectively communicate science to the public.

Tuesday, February 21, 2023, 6 p.m, EDT, via Zoom

Link will be provided upon registration
