

Kate Wallis, MD, MPH, FAAP is a developmental-behavioral pediatrician (DBP) at the Children's Hospital of Philadelphia (CHOP) and an Assistant Professor of Pediatrics at the University of Pennsylvania's Perelman School of Medicine. As a clinician, Dr. Wallis helps care for children with neurodivergence (including autism, ADHD, and other intellectual and developmental disabilities). Dr. Wallis is also a health equity researcher who studies the identification of and care for children with developmental disorders and autism. Dr. Wallis is faculty in CHOP's PolicyLab, CHOP's Center for Autism Research, CHOP's Clinical Futures, and the Penn Center for Public Health Initiatives. She serves as a lead on the Developmental and Behavioral Pediatric Research Network (DBPNet) Health Equity Node and on the CHOP Center for Health Equity Research Core. She is the winner of the 2024 Early Career Award from the American Academy of Pediatric's Council on Children with Disabilities.

Dr. Wallis completed her combined MD/MPH degrees at Stony Brook University School of Medicine. She completed pediatrics residency at NYU School of Medicine/Bellevue Hospital and fellowship in Developmental and Behavioral Pediatrics at Children's Hospital of Philadelphia. She lives in Philadelphia with her partner and two young children.
